

Example article on how to use templates

Frank Loesche
Affiliation

This example uses apa.template and actually puts some meta-data and variables from the mark-down file into the template. The same template can therefore be used across different publications, but the template is slightly more difficult to generate. Have a look at apa-simple.template for a much simpler example.

Keywords: R, RMarkdown, APA, LaTeX, template

Introduction

Citations go inside square brackets and are separated by semicolons. Each citation must have a key, composed of “@” + the citation identifier from the database. For example, we have published a paper together (Torre and Loesche 2016). In another paper, which we cite in text, without parentheses, Navon (1977) talks about visual perception; and in another paper, for which we don’t want to repeat the name of the author, he talks about psychology again (1984). This initial paragraph is followed by a number of meaningless lorem ipsum paragraphs. Please ignore.

Saperet occurreret mel te, nec audiam labitur scriptorem in, cu tantas impetus vel. Alia oratio vix at, cum at oporteat periculis ullamcorper. Mea dicunt mollis tacimates cu, eam ipsum iuaret molestie ad. Ea mel quas insolens rationibus, pri ut diam erat detracto, ut nec facete denique maluisset. Ne usu unum perpetua.

Etiam doctus eu his, mea alia tota facilis eu, mucus adipisci consulatu ea pro. Pri ea sale salutandi repudiare, qui ea atqui facer accusam. Eu usu reque vocibus, id doctus facilisi imperdiet qui. Vix facete suscipit no.
