ilaria.torre@plymouth.ac.uk, frank.loesche@plymouth.ac.uk

1. Header 1

This is some very basic text.

1.1. Header 2

This is some other text in a sub-heading. You can go on until level 6.

Newlines are interpreted as new paragraphs.

I can emphasize text like *this* or like **this**.

Unordered lists are created with symbols like *, -, +... but the first item of the list needs to be preceded by an empty line:

- I like cooking
- I also like languages
- and I like folk music

    - especially Blackbeard's Tea Party!

Ordered lists are created with numbers and dots. Even if you mess up the numbering, MD will fix it for you:

1. Item 1
2. Item 2
3. Item 3

Links can be added in text like this: click here or like this: http://www.blackbeardsteaparty.com/

Images are basically links, but they have to be also separated from the main text by an empty line before and after:

Figure 1: A super fluffy cat

Tables can be written with – and || symbols:

Tables	Are	Cool
col 3 is	right-aligned	$1600
col 2 is	centered	$12
zebra stripes	are neat	$1
